

## Valeo launches a new 2006 Lighting and Signalling European Catalogue

**PARIS, France, May 26th, 2006** – Valeo launches the new edition of the 2006 Lighting and Signalling catalogue, to include over 1500 part numbers. With over 80 completely new ones, the catalogue covers more than 10 additional passenger car and light utility vehicles with left-hand drive.

As an Original Equipment supplier, 100% of the Valeo Aftermarket lighting range is Original Equipment quality and therefore labelled valeorigin: the reassurance of a high-tech manufacturing process combined with rigorous testing for quality and safety.

The new catalogue includes part numbers for over 680 headlamps, 120 auxiliary headlamps, 330 rear lamps, and 250 front lamps, for numerous recent applications such as: Renault Clio III, VW Golf Plus and Polo IV Restyling, new Passat Opel Tigra Twin-Top, Alfa Romeo 147 Restyling, Nissan Micra 2005...

Advantages of this new edition include:

- product colour photos for over 95% of references,
- for those applications with xenon technologies, a symbol indicating which products are supplied with bulbs and ballasts,
- a specific chapter dedicated to levelling devices, sorted by part number for easy reference – the range comprises over 40 levelling devices
- a new chapter summarizing principal vehicles not equipped by Valeo in OE, thus providing a complete reference tool for the repair professional
- a page detailing Valeo's technological innovations: xenon bi-function, bending-light, LEDs...

Simple and easy to use, the new catalogue is in 6 languages and currently available.

*Valeo Service is the aftermarket activity of the Valeo Group and supplies high quality parts and services to both OES and IAM customers. Valeo Service is supported by the expertise of the Group's twelve industrial branches and their leading positions in the Original Equipment market.
