

## Valeo launches a new European Clutches Catalogue for 2006

**PARIS, France, 3 March 2006** – Valeo, a major player on the clutches market, has just released its Light Vehicles Clutches catalogue for 2006. This year's issue has 224 new part numbers, including 130 traditional kits, and presents the full range of market innovations for the first time. The catalogue's 1,207 kits include 1,102 traditional kits, 30 kits with hydraulic release bearing and 8 four-part kits. There are also 35 hydraulic release bearings and 7 flywheels.

The new applications include products for the Fiat Grande Punto, Ford Fiesta and Focus, Opel Astra H, Citroën C4, Peugeot 407 and 1007, Renault Modus and Mégane, the new Volkswagen 1.9 Tdi, and the Toyota Yaris.

The new catalogue has the following advantages:

- a new, more readable layout, with separate columns for traditional kits and for other clutch products, like the four-part kits, or three-part kits with hydraulic release bearing;
- a new "power" column has been added, listing the specific part numbers for different kinds of engine, including new diesel engines—HDI, Tdi, dCi, etc—which use different clutches according to the power of the vehicle;
- an inside page featuring the major innovations (in eleven languages), especially the dual mass flywheel, the hydraulic release bearing, the flexible flywheel, the self-adjusting system, the long travel damper...

Straightforward and user-friendly, the catalogue is available in several languages from March 2006.

*Valeo Service supplies high quality parts and services to both OES and IAM customers. Valeo Service is supported by the expertise of its twelve industrial branches and their leading positions in the Original Equipment market. Valeo Service has one of the most extensive offers for the aftermarket with 176 product ranges covering 12 product functions for passenger vehicles and trucks.*
